

#	Task	Case – Study Angle	Points	Deliverable
D	Automate with Data Factory	IT asks for a repeatable nightly ingest of raw files to a landing zone.	10	taskD.json – pipeline run output for a Copy Data activity from raw/smartgear_sales.csv → landing/smartgear_sales_.csv

D Solution :

Step 1: Create Linked Service to Data Lake

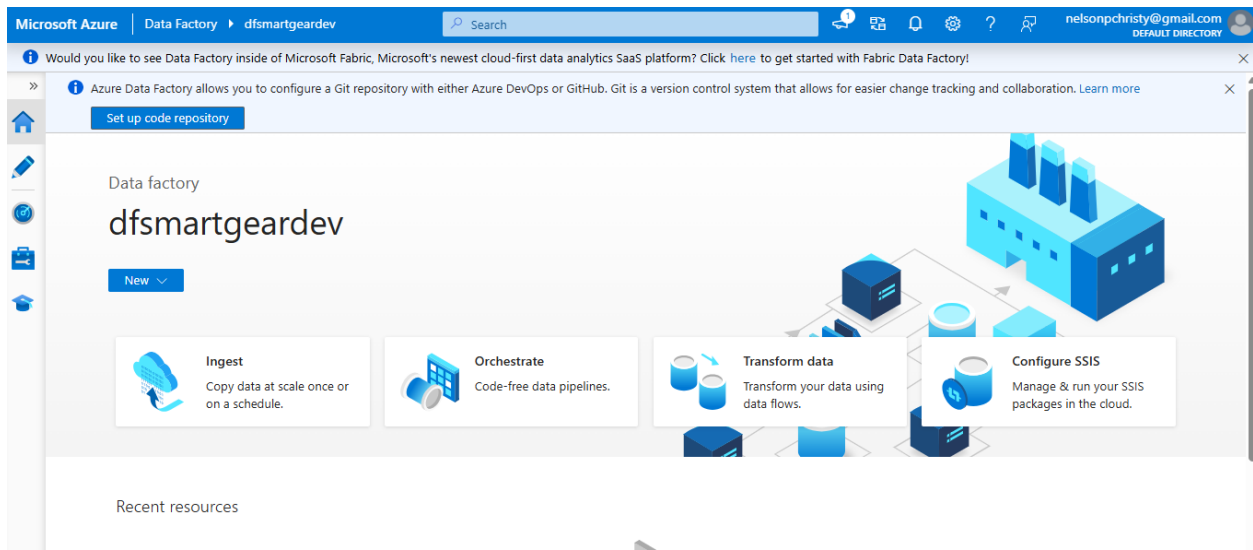

📁 Step 2: Create Datasets

🔧 Step 3: Build the Pipeline

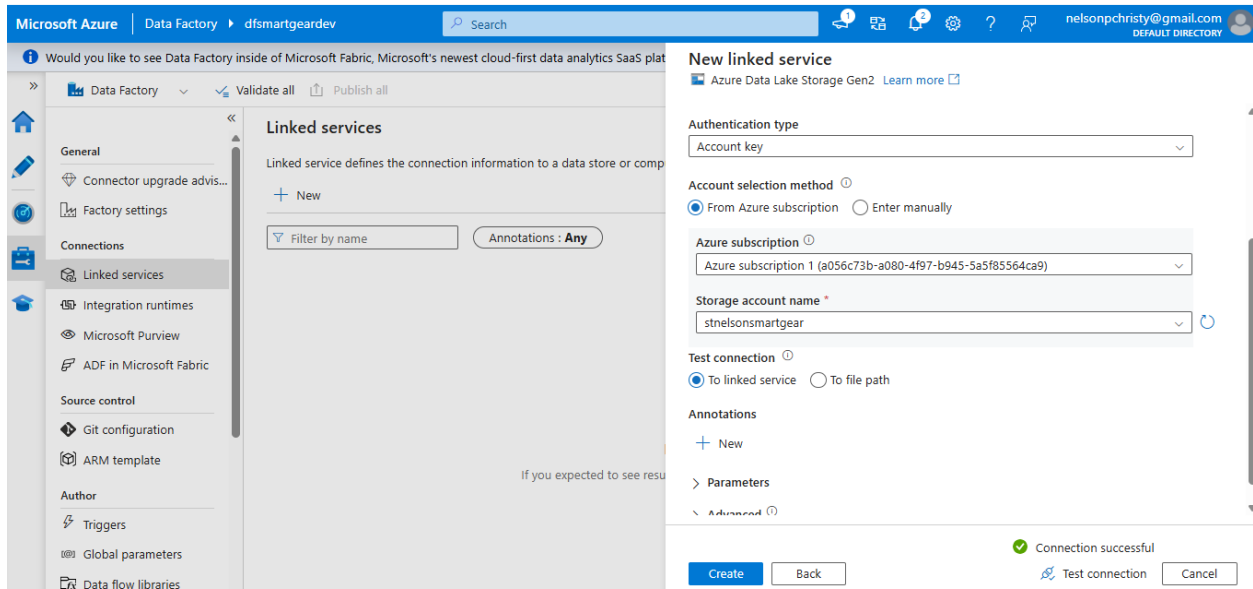

▶ Step 4: Trigger & Monitor

❖ Creating Azure Data Factory Studio

The screenshot displays the Microsoft Azure portal interface. At the top, the navigation bar shows 'Microsoft Azure' with a search bar and user profile 'nelsonpchristy@gmail.c...'. The breadcrumb trail indicates the path: Home > Microsoft.DataFactory-20251029110321 | Overview > rg-smartgear-dev > dfsmartgeardev. The main content area shows the 'Overview' page for the Data factory (V2) 'dfsmartgeardev'. On the left, a sidebar menu lists options: Overview (selected), Activity log, Access control (IAM), Tags, Diagnose and solve problems, and Resource visualizer. The 'Overview' section includes a 'Delete' button and a search bar. The 'Essentials' section provides key information: Resource group (rg-smartgear-dev), Status (Succeeded), Location (Central India), Subscription (Azure subscription 1), and Subscription ID (a056c73b-a080-4f97-b945-5a5f85564ca9). It also shows the Type as 'Data factory (V2)' and a 'Getting started' link. Below this, there is a large blue icon of a factory and the text 'Azure Data Factory Studio' with a 'Launch studio' button. At the bottom, there are four empty rectangular boxes.

❖ Creating Linked Service

❖ Creating Linked Service

The screenshot shows the Microsoft Azure Data Factory interface. The top navigation bar includes 'Microsoft Azure', 'Data Factory', and the user 'dfsmartgeardev'. A search bar is present. Below the navigation bar, a message asks if the user wants to see Data Factory inside Microsoft Fabric. The left sidebar contains a navigation menu with options like 'General', 'Connector upgrade advis...', 'Factory settings', 'Connections', 'Linked services' (selected), 'Integration runtimes', 'Microsoft Purview', 'ADF in Microsoft Fabric', 'Source control', 'Git configuration', 'ARM template', 'Author', 'Triggers', and 'Global parameters'. The main content area is titled 'Linked services' and includes a '+ New' button, a 'Filter by name' input, and an 'Annotations: Any' dropdown. It shows 'Showing 1 - 1 of 1 items' and a table with one entry:

Name ↑↓	Type ↑↓	Related ↑↓	Annotations ↑↓
lssmartgeardatalake	Azure Data Lake Storage Gen2	0	

Linked Service >> Datasets

The screenshot shows the 'New dataset' dialog in the Microsoft Azure Data Factory interface. The left sidebar shows 'Factory Resources' with a search bar and a list of resources: 'Pipelines' (0), 'Change Data Capture (preview)' (0), 'Datasets' (0), 'Data flows' (0), and 'Power Query' (0). The main content area is titled 'New dataset' and includes a description: 'In pipeline activities and data flows, reference a dataset to specify the location and structure of your data within a data store. Learn more'. Below this is a 'Select a data store' section with a search bar and a tabbed interface with tabs for 'All', 'Azure', 'Database', 'File', and 'Generic protocol'. The 'All' tab is selected, showing a grid of data store options: 'Amazon RDS for Oracle', 'Amazon RDS for SQL Server', 'Amazon Redshift', and three other options represented by icons. At the bottom, there are 'Continue' and 'Cancel' buttons.

❖ Linked Service >> Datasets
