

#	Task	Case – Study Angle	Points	Deliverable
A	Provision Storage	Finance wants a secure place for raw POS dumps.	10	taskA.pdf – screenshots/CLI output showing: • Resource group rg-smartgear-dev • Storage account st<initials>smartgear • Container raw with the CSV uploaded

A Solution :

Open Windows PowerShell and login to azure account :

❖ `az group create --name rg-smartgear-dev --location centralindia`

```

Windows PowerShell
PS C:\Users\ADMIN> az group create --name rg-smartgear-dev --location centralindia
{
  "id": "/subscriptions/a056c73b-a080-4f97-b945-5a5f85564ca9/resourceGroups/rg-smartgear-dev",
  "location": "centralindia",
  "managedBy": null,
  "name": "rg-smartgear-dev",
  "properties": {
    "provisioningState": "Succeeded"
  },
  "tags": null,
  "type": "Microsoft.Resources/resourceGroups"
}
PS C:\Users\ADMIN> |

```

❖ `az storage account create --name stnelsonsmartgear --resource-group rg-smartgear-dev --location centralindia --sku Standard_LRS --kind StorageV2 --hierarchical-namespace true`

```

Windows PowerShell
PS C:\Users\ADMIN> az storage account create --name stnelsonsmartgear --resource-group rg-smartgear-dev --location centralindia --sku Standard_LRS --kind StorageV2 --hierarchical-namespace true
Option '--hierarchical-namespace' has been deprecated and will be removed in a future release. Use '--hns' instead.

S C:\Users\ADMIN>
```

- ❖ Creating Storage key
- ❖ `$storageKey = (az storage account keys list --account-name stnelsonsmartgear -g rg-smartgear-dev --query "[0].value" -o tsv)`

```
PS C:\Users\ADMIN> $storageKey = (az storage account keys list --account-name stnelsonsmartgear -g rg-smartgear-dev --query "[0].value" -o tsv)
PS C:\Users\ADMIN>
```

- ❖ Raw : for uploading data.
- ❖ landing : to copy data using ETL pipeline
- ❖ curated : to save result of aggregated total quantity by region.

- ❖ `az storage container create --name raw --account-name stnelsonsmartgear --auth-mode login`

```
Windows PowerShell
PS C:\Users\ADMIN> az storage container create --name raw --account-name stnelsonsmartgear --auth-mode login
{
  "created": true
}
PS C:\Users\ADMIN>
```

- ❖ `az storage container create --name landing --account-name stnelsonsmartgear --account-key $storageKey`
- ❖ `az storage container create --name curated --account-name stnelsonsmartgear --account-key $storageKey`

```

PS C:\Users\ADMIN> az storage container create --name raw --account-name stnelsonsmartgear --auth-mode login
{
  "created": true
}
PS C:\Users\ADMIN> az storage container create --name landing --account-name stnelsonsmartgear --account-key $storageKey
{
  "created": true
}
PS C:\Users\ADMIN> az storage container create --name curated --account-name stnelsonsmartgear --account-key $storageKey
{
  "created": true
}
PS C:\Users\ADMIN>

```

- ❖ `az storage blob upload --account-name stnelsonsmartgear --account-key $storageKey --container-name raw --name "smartgear_sales.csv" --file "C:\Users\ADMIN\Downloads\smartgear_sales.csv" --overwrite`

```

Windows PowerShell
PS C:\Users\ADMIN> az storage container create --name raw --account-name stnelsonsmartgear --auth-mode login
{
  "created": true
}
PS C:\Users\ADMIN> az storage container create --name landing --account-name stnelsonsmartgear --account-key $storageKey
{
  "created": true
}
PS C:\Users\ADMIN> az storage container create --name curated --account-name stnelsonsmartgear --account-key $storageKey
{
  "created": true
}
PS C:\Users\ADMIN> az storage blob upload --account-name stnelsonsmartgear --account-key $storageKey --container-name raw --name "smartgear_sales.csv" --file "C:\Users\ADMIN\Downloads\smartgear_sales.csv" --overwrite
